

Almost 264,000 pedestrians became casualties on the highway in 1963.

College Prep Classes Emphasized in Torrance

Whether or not a Torrance student plans to go on to college may make a difference on what courses he takes in high school this fall, according to Dr. Bruce Wagner, curriculum consultant.

As a result of counseling, students will be guided into either a college or general course of study.

Although all students are required to take four years of history and three years of English, there is a difference in the emphasis of the two groups of students. College-bound students will have more opportunity for independent research on advanced projects.

MATH STUDENTS will be able to take a minimum two year course to meet graduation requirements or a college preparatory program

Back-to-School Styles, Colors

At Shoe Market

A variety of styles and colors await the back-to-school shopper who's looking for shoes at the Shoe Market in Rolling Hills Plaza.

The modern, self-service shoe center has one of the largest inventories of back-to-school shoes in the area, clearly marked and ready for your selection.

Well-trained and courteous clerks are available to aid in the proper fitting when the customer requests help.

Nurses Offered Immediate Appointments in Navy Corps

Registered professional nurses who are now active in the profession may be eligible for immediate appointments in the Navy Nurse Corps, Chief Vandorne E. Isaak announced this week.

Student nurses may apply for appointments as early as six months before graduation, Chief Isaak noted. Grades will depend on education and nursing experience.

Navy nurses may be assigned to a field of general nursing or operating room assignment, anesthesiology, nuclear

which would include two or more years of algebra, geometry and trigonometry. Those who plan to major in math will be able to get in college algebra, analytic geometry, and calculus while still in high school.

In science, the general student will be able to fill minimum graduation requirements by taking general science or modern science while the college-bound student may add laboratory courses in biology, physiology, chemistry and physics.

Three alternatives will be offered the pre-college student: a program which meets minimum college entrance requirements, a maximum program for university entrance which might include four years of English, three years of science, three years of language, and four years of math; and a special-interest program for those planning to major in music, art, speech or drama.

Army PFC James E. Foster, 18, son of Mr. and Mrs. Charles W. Foster, 2136 W. 248th St., was awarded the Expert Infantryman's Badge while assigned to the 7th Infantry Division in Korea. The badge is the Army's highest peacetime proficiency award for skilled and combat ready infantrymen.

Foster is an honor guard in the division's Headquarters Company. He entered the Army in August 1963 and is a 1963 graduate of Narbonne High School.

nursing, or teaching. Clinical assignments such as medical, surgical, cardiac, or nursing service administration also are made.

Student nurses in their junior or senior years at an accredited school of nursing may be eligible to complete their education at Navy expense, Chief Isaak said.

Interested women may write to Lt. Barbara Thomas (NC) USN, Navy Nurse Officer Procurement, 759 S. Figueroa St., Los Angeles 17, or visit the local recruiting station at 1520 Craven Ave.

Central Library Meets Torrance School Needs

How many books does the average Torrance teacher check out of the Educational Materials Building library shelves each year?

According to Roderick McDaniels, curriculum consultant, in the course of a school year she fills her audio-visual shopping cart with 314 library books, 286 supplemental textbooks, 13 films, 34 audio-visual items, three professional books, and 10 miscellaneous items. Those miscellaneous tidbits could be anything from Braille books to sheet music.

This is in addition to the basic and supplemental state

textbooks available at the teacher's school, McDaniels pointed out.

WHEN YOU add up all the items checked out by all the teachers in the course of a year, it totals nearly half a million items.

The shopping cart McDaniels refers to isn't just a figure of speech. Torrance teachers literally rove the aisles of the Educational Materials Building with the type of cart usually seen at the supermarket. It is part of an overall district scheme to cut costs by eliminating duplication of space and personnel.

Instead of having separate libraries at each elementary school, the EMB serves as a central library for the district's 34 elementary schools. Money saved on building and operations is used to purchase additional books and materials for students.

SINCE OPENING in May, 1958, the Educational Materials Building has continually enlarged services and inventory to keep pace with student growth. Today the teacher, using her market cart, may select from nearly 300,000 books, filmstrips, records and supplementary materials.

Modern handling processes are used to process her selection and enable the teacher to take her teaching material with her if she wishes. Daily truck deliveries and pick-ups to each school keeps items in maximum circulation.

Francis R. Diekmann, fireman apprentice, USN, son of Mr. and Mrs. R. F. Diekmann, 2701 West 168th Pl., recently returned to Pearl Harbor, Hawaii aboard the frigate USS J. S. McCain, completing a tour of duty with the Seventh Fleet in the Far East.
